DIGITAL LITERACY PROJECT REPORT

NAME : ANOUSHKA GAUTAM

REG NO. : 25BHI10007

BRANCH : B.TECH HEALTH INFORMATICS

INTRODUCTION

Digital literacy is an essential skill in today’s technology-driven world. As a Student Digital Ambassador, the objective of this project was to develop awareness about effective and responsible use of digital tools and platforms. This project includes five tasks covering various aspects such as digital awareness, professional online presence, coding platforms, communication etiquette, and cybercrime awareness.

Through these tasks, I explored different digital tools, created online profiles, practiced coding, and learned about safe internet practices. The project not only enhanced my technical knowledge but also improved my communication and online behavior. It provided practical exposure to platforms that are widely used in academics and professional environments.

TASK 1 : INFOGRAPHIC

In this task, I created a digital literacy awareness infographic using Canva. The infographic highlights key concepts such as the meaning of digital literacy, useful digital tools for students, safe internet practices, and the importance of maintaining a professional online presence. I structured the content into clear sections and used icons, colors, and bullet points to make the design visually appealing and easy to understand.

The infographic emphasizes how digital literacy is essential for students in academics and future careers. It also introduces commonly used tools like Google Docs, GitHub, and LinkedIn, which help in collaboration, project management, and professional networking. Additionally, it spreads awareness about safe internet practices such as using strong passwords and avoiding suspicious links.
One challenge I faced was balancing the amount of text with visual elements

without overcrowding the design. This task helped me improve my ability to present information effectively and understand the importance of visual communication.

TASK 2: DIGITAL PORTFOLOIO

In this task, I created and updated my profiles on platforms such as GitHub, LinkedIn, and Kaggle. These platforms are widely used for showcasing skills, networking with professionals, and practicing technical knowledge. On GitHub, I created a profile README that includes my basic details and learning goals. On LinkedIn, I updated my education section with my current degree and institution.

Each platform serves a unique purpose. GitHub helps in managing and sharing projects, LinkedIn is useful for building a professional identity, and Kaggle provides opportunities to practice data-related skills. Creating these profiles

helped me understand the importance of maintaining a professional digital presence.

In the coming years, I plan to regularly update these platforms by adding projects, certifications, and achievements. This will help me build a strong portfolio and improve my career opportunities.

TASK 3: PLATFORMS

In this task, I explored coding and collaboration platforms to enhance my digital skills. I created an account on HackerRank and completed a beginner-level problem. This helped me understand basic problem-solving techniques and gave me practical exposure to coding environments.

Additionally, I created a Google Form titled “Digital Literacy Awareness Quiz” using Google Forms. The form included five questions related to digital literacy and was connected to a response sheet for collecting answers. This activity demonstrated how digital tools can be used for data collection and

collaboration.

This task helped me understand the importance of online platforms in academic learning. Coding platforms improve logical thinking, while tools like Google Forms help in organizing information efficiently. These skills will be useful in my academic journey and future projects.

TASK 4: EMAIL ETIQUETTE

This task focused on understanding professional communication and email etiquette. I drafted two formal emails: one requesting an assignment extension and another expressing interest in a summer internship opportunity. Both emails followed proper structure, including a clear subject line, professional greeting, concise body, and appropriate closing.

I also created a social media do’s and don’ts checklist to promote responsible

online behavior among students. This helped me understand how important it is to communicate respectfully and professionally in digital environments.

Poor digital communication can lead to misunderstandings and negative impressions. For example, sending informal or unclear emails to professors may result in delayed responses. This task taught me the importance of clarity, tone, and structure in professional communication.

TASK 5: CYBERCRIME AWARENESS

In this task, I explored cybercrime awareness by studying UPI-based online payment fraud. I learned how fraudsters use techniques such as fake calls, phishing links, and collect requests to trick users into sharing sensitive information or authorizing payments.

What surprised me most was how easily people fall victim to such scams due to

lack of awareness. Many users do not realize that a UPI PIN is only required for sending money, not receiving it. This misunderstanding is often exploited by attackers.

As a result of this task, I will be more cautious while making online transactions. I will verify requests carefully and avoid sharing confidential information. This awareness will help me stay safe in the digital world.

CONCLUSION:

This project provided valuable insights into various aspects of digital literacy. It helped me understand the importance of using digital tools effectively, maintaining a professional online presence, and practicing safe internet habits. I gained hands on experience with platforms like GitHub, HackerRank, and Google Forms, which are useful for academic and professional growth. Additionally, I learned how to

communicate professionally through emails and how to protect myself from cyber threats. Overall, this project enhanced my technical, communication, and digital awareness skills, which will be beneficial in my future academic and career journey.
